NMDC Ltd — FY 2024 Annual Report Analysis

Annual Report Analysis (Consolidated)

Investor Snapshot

#	Analytical point	Sentiment
1	**NMDC maintains a dominant market position as a pure-play miner with an 18% market share and a high-grade (64% Fe) ore moat that ensures premium pricing.**	—
2	**Revenue grew 20.6% YoY to □21,308 Cr, supported by record production volumes exceeding 45 MTPA and consistent off-take.**	—
3	**EBITDA margins remained robust with 20.5% growth to □7,294 Cr, mirroring top-line expansion and reflecting strong operational efficiency.**	—
4	**Profitability is backed by exceptional cash generation, with CFO at □7,394 Cr exceeding PAT of □5,567 Cr by 32.8%, indicating high-quality earnings.**	—
5	***Short-term debt increased 58% to 3,356 Cr, a tactical move to maintain high-yield FD spreads, though the company remains in a strong net-cash position with 12,364 Cr in liquidity.***	—
6	**The balance sheet is characterized by extreme liquidity and a D/E ratio < 0.1x, providing a massive buffer for both aggressive expansion and dividend payouts.**	—
7	**Capital expenditure is strategically focused on evacuation infrastructure, evidenced by a 62% increase in CWIP to □3,230 Cr, targeting the critical slurry pipeline.**	—
8	**Earnings quality is bolstered by conservative accounting policies, specifically the non-valuation of ROM ore and slimes, which prevents artificial profit inflation.**	—
9	***Governance is a primary concern due to massive Related Party Transaction (RPT) exposure exceeding 5,300 Cr (80% of CFO) and an audit trail (edit log) failure at the database level.***	—
10	***Material risks include a 1,623 Cr contingent liability regarding the "Common Cause" judgment and potential impairments on a 639 Cr advance to subsidiary KVSL.***	—
11	**The outlook is centered on "Vision 2030" to reach 100 MTPA, with structural margin expansion of ~□500/tonne expected once the slurry pipeline removes current rail-locked bottlenecks.**	—
12	**Investment View: ACCUMULATE; the world-class asset quality and volume visibility outweigh PSU governance discounts; monitor RPT levels to NSL and CWIP-to-block conversion.**	—

1. Business overview (In Bullet Points)

- **Business Segments:** NMDC is India’s largest iron ore miner, recently repositioned as a "pure-play" mining major following the demerger of the Nagarnar Steel Plant.
- **Revenue Drivers:** Primarily driven by high-grade iron ore (64% Fe content) production and sales. Revenue is highly sensitive to domestic steel demand and global iron ore price benchmarks.
- **Cost Drivers:** Major costs include Royalty and statutory levies (43.24% of revenue), logistics (rail freight), and "Other Expenses" including security for Naxal-affected mining zones.
- **Industry Position:** Maintains a dominant 16-18% share of domestic iron ore production; acts as a strategic proxy for India’s infrastructure and steel consumption.

- **Expansion Plans:** Executing "Vision 2030" with a target to reach 100 MTPA production capacity, doubling current levels.
- **Capacity Additions:** Significant focus on evacuation infrastructure, including the doubling of the KK (Kottavalasa-Kirandul) rail line and the 15 MTPA Bailadila-to-Vizag slurry pipeline.
- **Segment Performance:** Record production volumes achieved in FY24 (45 MTPA+), with revenue growing 20.6% YoY.
- **Geographical Presence:** Operations are heavily concentrated in Chhattisgarh (Bailadila) and Karnataka (Donimalai). International exposure is maintained through Legacy Iron Ore (Australia) for critical minerals like Gold and Lithium.

2. Management commentary & outlook

- Management has shifted from a defensive posture during the steel plant demerger to an aggressive growth strategy focused on volume scaling.
- The primary strategic goal is "Vision 2030," aiming for 100 MTPA capacity, prioritizing volume growth over short-term price optimization.
- Evacuation infrastructure is identified as the current bottleneck; management is prioritizing the completion of the slurry pipeline and rail doubling to match mining capacity.
- Digital transformation and the implementation of Fleet Management Systems are being prioritized to bring operational efficiency in line with global mining majors.
- Management maintains a "cautiously optimistic" outlook on the ₹4,510 Cr Karnataka royalty dispute, opting not to provision aggressively in anticipation of legal delays or favorable outcomes.
- Strategic supplies to RINL (Rashtriya Ispat Nigam Ltd) are framed as a "partnership," despite the resulting buildup in receivables and the need for bill discounting.
- The global footprint in Australia is viewed as a long-term hedge and a gateway into the critical minerals sector, though domestic iron ore remains the core focus.
- Management Tone: The leadership projects a confident, execution-oriented image backed by record production volumes. However, there is a visible tension between the ambitious 100 MTPA vision and the ground reality of logistics bottlenecks and the "quasi-fiscal" burden of supporting other PSUs like RINL and the demerged NMDC Steel Ltd. The tone suggests that National Interest and volume growth are currently prioritized over aggressive cash conversion and shareholder alpha. (Confident but Operationally Constrained)

3.2 Financial analysis summary

- **Revenue** grew by 20.61% to □21,308 Cr, driven by record production volumes of 45 MTPA+, while EBITDA rose 20.48% to □7,294 Cr, maintaining stable operating margins despite high royalty costs.
- **CFO** at □7,394 Cr significantly exceeded PAT of □5,567 Cr (a 32.8% surplus), indicating high earnings quality and strong cash conversion supported by a □1,869 Cr release from Working Capital.
- **Trade Receivables** decreased by 19.5% to □3,509 Cr despite the revenue jump, though this is offset by a massive □3,984 Cr exposure to the demerged NMDC Steel Ltd (NSL) and □1,999 Cr tied up with RINL.
- **Capex** increased to □1,847 Cr, primarily funded through internal accruals as CFO coverage of Capex remains robust at 4.00x, focusing on the Slurry Pipeline and SP-III projects.
- **CWIP** surged by 62% to □3,230 Cr, signaling a large pipeline of assets nearing completion, although □427 Cr of projects have been stalled for over 3 years, posing a minor impairment risk.
- **Total Debt** (Short-term) rose 58% to □3,356 Cr despite a massive Cash and Bank Balance of □12,364 Cr, as management opted to maintain gross leverage to preserve high-yield Fixed Deposits.
- **Other Income** surged 78% to □1,371 Cr, primarily due to Interest Income of □1,033 Cr, which now covers the company's Finance Costs more than 13x over.
- **Other Assets** are impacted by □1,053 Cr in non-productive "protest payments" related to the Common Cause litigation and □503 Cr in advances for coal blocks.
- **Other Expenses** reached □1,842 Cr (8.6% of revenue); the lack of granular breakdown for this large bucket remains a transparency gap.
- The dominant financial theme of the year is **strong operational cash generation being utilized to fund a massive infrastructure build-out while simultaneously acting as a liquidity backstop for demerged and associate PSU entities.**

3.3 Contingent liabilities & commitments

- **Common Cause Judgment:** A major demand of **□1,623.44 Cr** for compensation; the company has paid □600 Cr under protest, but the matter remains sub-judice.
- **Karnataka Royalty Dispute:** A potential liability of **□4,510 Cr** related to royalty calculations; management has not made aggressive provisions.
- **KVSL Advance: □639.61 Cr** advanced to subsidiary Karnataka Vijayanagar Steel Limited; auditors have flagged this via an "Emphasis of Matter" regarding recoverability.
- **Tax Disputes:** Multiple complex tax and other disputes exist where the final outcome is unpredictable, requiring significant management judgment.

3.9 Earnings quality & forensic checks

#	Check	Impact	Status	Notes detail
1	PAT vs CFO trend	Profit ↑ — high earnings quality; CFO ₹7,394 Cr exceeds PAT ₹5,567 Cr by 32.8%.	—	Strong cash conversion driven by working capital release of ₹1,869 Cr.
2	Receivables & channel-stuffing signal	Revenue ↑ — efficient collections; receivables fell 19.5% while sales grew 20.6%.	—	Debtor days improved from 90 to 60; no signs of aggressive revenue booking.
3	Revenue timing (unbilled/contract assets)	Revenue ↑↓ — variable consideration risk; Fe grade adjustments create estimation uncertainty.	—	Note 2.18: Revenue adjusted via bonus/ penalty clauses based on certified actual Fe grade.
4	Revenue from related parties %	Revenue ↑↓ — concentration risk; ₹3,984 Cr exposure to newly demerged NMDC Steel Ltd.	—	Note 2.35.4: Significant credit risk concentration in a single related party post-demerger.
5	Inventory vs revenue growth	Profit ↑ — conservative valuation; inventory grew only 4% vs 20.6% sales growth.	—	Note 2.7: Finished goods at ₹2,399 Cr; ROM ore and slimes are not valued.
6	Inventory valuation method change	Neutral — consistent conservative policy; ROM ore and slimes excluded from valuation.	—	Note 1.2.2.vi: Policy prevents earnings inflation from low-grade or unprocessed stocks.
7	Exceptional items in operating profit	Profit ↓ — non-recurring drag; exceptional expense of ₹284 Cr vs ₹1,242 Cr income.	—	Note 2.22 & 2.28: Swing in exceptional items significantly impacted bottom-line growth.
8	Depreciation rate vs useful life policy	Profit ↓ — active asset management; useful life review increased depreciation by ₹3.21 Cr.	—	Note 2.1.1: Review of HEM equipment and vehicle lives to reflect technical wear.
9	Provision reversals boosting PAT	Neutral — no major reversals; credit impaired provisions remained static at ₹1,906 Cr.	—	Note 2.8.1b: ₹1,892 Cr due from Monitoring Committee remains fully provided.
10	Tax rate consistency	Profit ↓ — higher tax outflow; cash tax ₹1,824 Cr vs P&L tax ₹2,385 Cr.	—	Effective tax rate increased; cash tax is lower than P&L provision.
11	CWIP age and stalling projects	Profit ↓ — impairment risk; CWIP rose 62% with ₹427 Cr aged >3 years.	—	Note 2.2.3: Long-term aging in "Others" suggests potential stalled sub-projects.
12	Deferred tax asset recognition adequacy	Neutral — auditor focus; complex tax disputes require significant management judgment.	—	KAM 3: Complexity of tax and other disputes makes final outcomes unpredictable.
13	RPT quantum and trend	Profit ↑↓ — recoverability risk; ₹639.6 Cr advance to KVSL flagged by auditors.	—	Note 2.31: Emphasis of Matter regarding recoverability of dues from subsidiary KVSL.
14	Dividend paid vs FCF adequacy	Neutral — sustainable payouts; ₹2,521 Cr dividend well covered by ₹5,547 Cr FCF.	—	Dividend payout at 38%; strong liquidity with ₹12,364 Cr cash equivalents.
15	Audit Trail Integrity	Neutral — Internal control weakness; edit log not enabled at database level.	—	Risk of undetected data manipulation in accounting software.
16	Subsidiary Impairment Risk	Profit ↓ — Potential write-down; ₹639.61 Cr advance to KVSL flagged.	—	Auditor concern over the recoverability of advances to the KVSL subsidiary.

4. Management & governance

A. Auditor Report & Key Audit Matters * **KAM 1: Revenue & Royalty:** Auditor flagged risks in "Fe" (iron) grade adjustments and IBM rate complexities. Management uses bonus/penalty clauses based on certified grades, which introduces variable consideration risks. * **KAM 2: Capital Work-in-Progress (CWIP):** Auditor focused on the materiality of project spend (□3,230.51 Cr) and the judgment required for capitalization timing, especially for the Slurry Pipeline and SP-III projects. * **KAM 3: Mine Closure Obligation (MCO):** Significant estimation uncertainty in calculating future closure costs. Auditor reviewed the methodology and arithmetical accuracy of the committee's cost estimates. * **Emphasis of Matter:** Auditor highlighted the recoverability of □639.61 Cr advanced to subsidiary Karnataka Vijayanagar Steel Limited (KVSL), signaling potential impairment risk. * **Internal Control Observation:** Audit Trail (Edit Log) facility was NOT enabled at the database level for the accounting software, though enabled at the application level. This represents a significant gap in data integrity controls.

B. Related Party Transactions | Party | Relationship | Nature | Amount (□Cr) | Concern | | :--- | :--- | :--- | :--- | :--- | | NMDC Steel Limited (NSL) | Demerged Entity | Demerger Dues (Receivable) | 2,502.64 Cr | ***Credit Risk*** | | NMDC Steel Limited (NSL) | Demerged Entity | Trade Receivables | 1,395.61 Cr | ***Liquidity Risk*** | | RINL | Associate/PSU | Trade Receivables (incl. Discounted) | 1,999.34 Cr | ***Concentration Risk*** | | KVSL | Subsidiary | Advances | 639.61 Cr | ***Impairment Risk*** | | NMDC-CMDC Limited | Joint Venture | Investment | 89.07 Cr | Neutral |

- **RPT Risk Checks:** Total RPT Receivables (NSL + RINL) / Revenue = 28.08%. Total RPT Receivables (NSL + RINL) / CFO = 80.92%.
- **Verdict:** Governance Concern. The company is effectively acting as a massive credit provider to its demerged steel arm and other PSUs, with total related-party exposure nearly equal to its annual PAT.

C. Shareholding * **Promoters:** 60.79% (Stable) * **FIIs:** 12.45% (Increasing from 9.82% in Sep 2023) * **DIIs:** 18.11% (Stable) * **Public:** 8.65% (Decreasing) * **Promoter Pledge:** 0.00%

D. Board Composition + KMP Compensation * **KMP Compensation:** Aggregate KMP pay not granularly disclosed. Total Employee Benefit Expense rose to □1,625.54 Cr (up 6.2% YoY). * **Analysis:** Employee cost growth (6.2%) significantly lagged Operating Profit growth (20.48%), suggesting disciplined labor cost management. However, the lack of granular KMP disclosure is a transparency gap for a Navratna PSU.

F. Capital Allocation & Capex | Action | FY current (□Cr) | FY prior (□Cr) | % of CFO | Signal | | :--- | :--- | :--- | :--- | :--- | | Dividends | 2,521.00 Cr | 1,099.00 Cr | 34.09% | **Positive** | | Capex | 1,847.00 Cr | 1,247.00 Cr | 24.98% | **Positive** | | Net Debt Change | 1,231.00 Cr | -907.00 Cr | 16.65% | — | | Working Capital Investment | -1,869.00 Cr | 3,615.00 Cr | -25.27% | **Positive** | | Interest Received | 976.00 Cr | 559.00 Cr | 13.20% | **Positive** |

- **CFO Coverage of Capex:** Ratio is 4.00x. NMDC is comfortably self-funding its expansion from internal accruals.
- **Nature of Capex:** Primarily growth-oriented, focusing on the **Slurry Pipeline** and SP-III projects.
- **Deployment Efficiency:** Revenue grew 20.61% while Gross Block remained flat, indicating growth is currently driven by pricing/utilization.
- **Key Takeaways: The 62% surge in CWIP to □3,230.51 Cr indicates a massive pipeline of assets nearing completion, which should drive future volumes.**

H. Risks * **Common Cause Judgment (High):** Demand for **□1,623.44 Cr**; risk of significant cash outflow. * **NSL Credit Risk (High):** **□3,984.33 Cr** exposure to demerged entity; risk of write-down if NSL fails. * **Royalty Sensitivity (High):** Royalty is **43.24% of revenue**; any IBM rate hike directly impacts OPM. * **Audit Trail Failure (Medium):** No database-level edit log; risk of undetected data manipulation. * **CWIP Aging (Medium):**

□**427.08 Cr** of projects stuck for >3 years; potential impairment risk. * **RINL Concentration (Medium): □1,999.34 Cr** tied up in a single PSU customer; reliance on bill discounting.

5. Scorecard & verdict

Part a: scorecard

Dimension	Rating (1–5)	Delta	Key evidence	One-line rationale
Business quality	4	→	18% Market Share; 64% Fe Grade	Dominant pure-play miner with high-grade reserves but logistics-constrained.
Financial health	5	→	D/E < 0.1x; CFO □7,394 Cr > PAT	Exceptional liquidity and cash generation; net cash position.
Earnings quality	4	↑	CFO > PAT; Conservative Inventory	Strong cash conversion and conservative valuation of ROM ore.
Management & governance	2	↓	RPT/CFO 80.9%; Audit Trail Flag	High related-party exposure and internal control gaps (Audit Trail).
Capital allocation & earnings visibility	4	↑	CWIP +62%; 100 MTPA Vision	Disciplined capex in evacuation infra provides clear volume growth visibility.

Business positives (for this company this year) * **Strong Cash Conversion:** CFO of □7,394 Cr exceeds PAT of □5,567 Cr by 32.8%, driven by efficient working capital management. * **Volume Growth:** Achieved record production of 45 MTPA+, supporting a 20.6% YoY revenue growth. * **Conservative Accounting:** Policy of not valuing ROM ore and slimes provides a cushion against earnings inflation. * **Robust Liquidity:** Cash and bank balances of □12,364 Cr provide a massive buffer for expansion and dividends. * **Strategic Capex:** 62% increase in CWIP (□3,230 Cr) targets critical evacuation bottlenecks (Slurry Pipeline).

Business negatives / concerns (for this company this year) * **Related Party Exposure:** Combined exposure to NSL and RINL exceeds □5,300 Cr, representing over 80% of annual CFO. * **Governance Red Flag:** Auditor noted that the Audit Trail (edit log) was not enabled at the database level. * **Litigation Risk:** Contingent liability of □1,623 Cr for the "Common Cause" judgment remains a threat to net worth. * **Subsidiary Risk:** Auditor Emphasis of Matter on the recoverability of □639.61 Cr advanced to KVSL. * **Logistics Dependency:** Growth remains "rail-locked" until the slurry pipeline is commissioned.

Overall scorecard summary NMDC remains a financially powerhouse with exceptional cash generation and a dominant market position in high-grade iron ore. Its financial health is top-tier, characterized by a net-cash balance sheet and strong CFO/PAT ratios. However, the governance posture is weakened by significant related-party exposures to other PSUs and the demerged steel arm, effectively acting as a lender of last resort. While the business is on a stable-to-improving trajectory regarding volume growth and infrastructure build-out, the governance and RPT risks require close monitoring.

Part b: governance check matrix

#	Check	Status
1	Audit opinion clean?	—
2	Promoter pledge = 0?	—
3	KMP pay < 5% of PAT?	—
4	RPT quantum < 5% of revenue?	—
5	Board > 50% independent?	—
6	At least 1 woman director?	—
7	No statutory dues outstanding?	—
8	No fraud reported?	—
9	Audit trail enabled?	—
10	Frequent Auditor change	—

Final line: "Total: 6/10 — Governance Rating: 3"

Part c: investor verdict

Thesis: NMDC is a world-class mining asset with a temporary "PSU discount" due to related-party credit burdens and logistics bottlenecks.

Overall stance: ACCUMULATE

Rationale: Strong volume growth visibility and high-grade ore moat outweigh the RPT risks, especially with the slurry pipeline nearing completion. Re-evaluate when: RPT exposure to NMDC Steel Ltd (NSL) exceeds □5,000 Cr or if the Slurry Pipeline commissioning is delayed beyond FY25. BULL CASE: Commissioning of the 15 MTPA slurry pipeline leads to a □500/tonne cost reduction and structural margin expansion. BEAR CASE: A major write-down of NSL or RINL receivables combined with an adverse "Common Cause" legal judgment. Key monitorable: CWIP to Gross Block conversion: □3,230 Cr → <□1,000 Cr.

7. Year-over-year analysis

7.1 Changes

Metric / theme	Summary a status (FY23)	Summary b status (FY24)	Forensic takeaway
Earnings Quality (CFO/PAT)	0.33 (Severe divergence)	1.33 (Strong conversion)	The company successfully reversed a massive working capital drag into a significant cash release.
Working Capital Cycle	94 Days (Receivables spike)	9 Days (Efficient collection)	Operational liquidity improved dramatically as the company cleared the previous year's inventory and receivable bottlenecks.
Capital Allocation	Debt reduction post-demerger	Increased short-term borrowing	Management is now leveraging the balance sheet to maintain high-yield cash spreads while funding aggressive capex.
Management Tone	Defensive / Cyclical focus	Aggressive / Volume-led growth	The strategic priority has shifted from surviving a downturn to doubling capacity via the "Vision 2030" roadmap.
Revenue Trajectory	32% Contraction	20.6% Growth	The business has transitioned from a sharp cyclical trough to a volume-driven recovery phase.
Capex Intensity	□1,247 Cr (67% of CFO)	□1,847 Cr (25% of CFO)	Expansion spending has accelerated, yet it is now much better covered by superior operating cash flows.
Audit/Internal Control	Standard PSU disclosures	Audit Trail (Edit Log) failure	A new governance risk has emerged regarding the integrity of the database-level accounting logs.

7.2 Persistent patterns

- **Quasi-Fiscal Burden:** The company consistently acts as a captive financier for struggling PSU associates (RINL) and its demerged entity (NSL), with **related-party exposure remaining a dominant threat to the balance sheet**.
- **Structural Litigation Risk:** Massive contingent liabilities, specifically the **□4,510 Cr Karnataka royalty dispute**, remain unresolved and continue to represent a potential "black swan" event for net worth.
- **Logistics Bottlenecks:** Growth remains structurally "rail-locked," with the **Slurry Pipeline and rail doubling projects appearing as recurring CWIP fixtures** that have yet to de-bottleneck operations.
- **Conservative Inventory Accounting:** Management maintains a **high-quality earnings buffer** by consistently excluding ROM ore and slimes from inventory valuation.
- **Dominant Market Moat:** NMDC maintains a **sustained 16-18% domestic market share** and a high-grade (64% Fe) ore profile that ensures consistent off-take regardless of the cycle.
- **Net Cash Resilience:** Despite shifts in gross debt, the company maintains a **massive liquidity cushion** with cash balances consistently exceeding total liabilities.
- **PSU Governance Friction:** Persistent lack of granular KMP compensation data and high RPT concentration continue to result in a **sustained "PSU discount" in governance ratings**.
