Sical Logistics Ltd — FY 2025 Annual Report Analysis

Annual Report Analysis (Consolidated)

Investor Snapshot

#	Analytical point	Sentiment
1	**Sical is a distressed legacy logistics player attempting a high-stakes pivot toward rail-linked assets while core mining operations have withered by 39%.**	Neutral
2	***Consolidated revenue remained stagnant at 222 Cr, indicating a failure to generate organic growth post-NCLT restructuring.***	Negative
3	**The SMART (Rail) segment is the sole outperformer, growing 15% to □120 Cr with a significant PBT contribution of □17.98 Cr.**	Positive
4	***Operating margins are under severe pressure as core operational losses are being masked by 22 Cr in non-recurring exceptional gains.***	Negative
5	***The balance sheet is in a state of technical insolvency with negative equity of 4.77 Cr and a Debt-to-Equity ratio that exploded to 14.86x.***	Negative
6	***Liquidity is at a critical breaking point with a Current Ratio of 0.36, as 269.94 Cr in debt maturities far exceed total current assets.***	Negative
7	***Negative Free Cash Flow of - 35 Cr highlights that stagnant operations are unable to fund the current capital expenditure program.***	Negative
8	***Aggressive capex of 52 Cr (420% of CFO) into the Chennai Rail Terminal is entirely debt-funded with uncertain returns before FY26.***	Negative
9	***Earnings quality is highly suspect given a 63.7% spike in receivables to 72 Cr despite flat YoY revenue growth.***	Negative
10	***Governance is compromised by 12.5% high-cost promoter loans totaling 184 Cr, non-compliant board composition, and Minimum Public Shareholding issues.***	Negative
11	***Solvency is further threatened by a sudden 115.01 Cr contingent liability disclosure related to indirect tax matters, representing over 50% of annual revenue.***	Negative
12	***Investment View: Avoid; monitor the Current Ratio and SMART terminal EBITDA for signs of life, though the trajectory remains one of promoter-led life support.***	Negative

1. Business overview (In Bullet Points)

- **Business Segments:** Sical Logistics operates primarily in two segments: **Integrated Logistics Services** (72.05% of revenue) and Integrated Warehousing Business (27.95% of revenue).
- **Revenue Drivers:** Revenue is driven by bulk coal and mining logistics (legacy core), rail-linked multimodal transport (SMART), and a growing pharmaceutical super-stockist warehousing model (PVLPL).
- **Cost Drivers:** Major costs include **Handling and Transportation** (□64.77 Cr), Finance Costs (□43.25 Cr), and Operation and Maintenance (□26.58 Cr).
- **Industry Position:** The company is transitioning from a distressed legacy logistics player to an asset-light feeder for the Pristine Group's broader rail network.

- **Expansion Plans:** Focus is heavily concentrated on the commissioning of the Chennai rail-linked cargo terminal (expected FY26) and expanding the pharmaceutical warehousing footprint.
- **Acquisitions & Capacity:** The company currently operates 11.5 lakh sq. ft. across 19 warehouses. No major acquisitions were noted, but a shift toward leasing equipment from the promoter is evident.
- **Segment Performance: SMART** (Rail) saw a 15% revenue increase to ₹120 Cr with PBT jumping to ₹17.98 Cr. Conversely, the Standalone mining business collapsed by 39% to ₹40 Cr.
- **Geographical Presence:** Primarily India-based, with a strategic focus on rail-linked terminals in Southern India (Chennai).

2. Management commentary & outlook

- Management is pivoting the business toward a "national super stockist model" for the pharmaceutical sector to move away from volatile, low-margin bulk logistics.
- The strategy involves a structural shift toward an asset-light model, evidenced by the leasing of 59 pieces of commercial equipment from the promoter rather than direct ownership.
- The upcoming Chennai rail-linked cargo terminal (SMART) is positioned as the primary growth catalyst for FY26.
- Management secured approval for a ₹250 Cr QIP in January 2025 but has deferred execution, citing a need to evaluate market conditions.
- The demand environment for mining logistics is described as having "enhanced execution momentum," despite a significant drop in standalone revenue.
- The long-term vision focuses on integrating Sical as a feeder for the Pristine Group’s national rail and logistics network.
- Promoter stake was reduced from 95% to 89.87% post-FY25 to gradually move toward SEBI’s Minimum Public Shareholding (MPS) requirements.
- Management Tone: There is a stark disconnect between the optimistic narrative of "execution momentum" and the actual financial performance, particularly in the legacy standalone business. The tone suggests a "clean slate" narrative following NCLT restructuring, yet the reliance on high-cost promoter funding and the delay in the QIP indicate significant underlying stress and a lack of institutional appetite. The verdict on management tone is **Cautious and Disconnected**, as qualitative optimism is not yet backed by quantitative recovery.

3.2 Financial analysis summary

- Stagnant **Revenue** of □222.00 Cr vs □221.00 Cr YoY reflects a lack of organic scaling post-resolution, with Integrated Logistics Services contributing 72.05% (□159.83 Cr) and Integrated Warehousing Business 27.95% (□61.99 Cr); this flat top-line is contrasted by a 63.7% surge in Net Trade Receivables to □72.00 Cr on the Balance Sheet, suggesting aggressive revenue booking or collection delays, further evidenced by □18.05 Cr in unbilled receivables.
- The company's **Operating Profit** of □21.00 Cr is insufficient to cover its massive Finance Cost of □43.00 Cr, which increased from □39.00 Cr YoY despite the debt restructuring; notably, □10.14 Cr of this interest is paid to related parties at a high rate of 12.5% p.a., indicating significant value leakage to the promoter group.
- A critical liquidity mismatch exists as **Current Maturities of Long-Term Debt** surged to □269.94 Cr, while total current assets (excluding earmarked cash) are inadequate to cover these obligations, forcing a 289% YoY increase in Short term Borrowings from related parties to □184.30 Cr to sustain operations.
- **Other Income** of □29.00 Cr significantly masks core operational weakness, as it includes a non-recurring □11.87 Cr gain on the sale of Fixed Assets and a □9.67 Cr reversal of fuel tax provisions, without which the PAT loss of -□26.00 Cr would have been substantially deeper.
- **Working Capital** efficiency has deteriorated sharply with Debtor Days ballooning from 73 to 119 days, and while CFO improved to □20.00 Cr, it was entirely consumed by a □84.00 Cr Capex program primarily directed toward CWIP for the Chennai ICD project (□52.14 Cr), resulting in a negative FCF of -□35.00 Cr.
- The **Balance Sheet** quality is undermined by □213.52 Cr of legacy Trade Receivables aged over 3 years which are fully provided for but remain on the books, and a new contingent liability of □115.01 Cr in indirect tax matters that threatens future cash reserves.
- **Depreciation** declined to □38.00 Cr from □48.00 Cr despite an increase in Gross Block, partly due to a shift in the cost structure where "Operation and maintenance" expenses dropped to □26.58 Cr while "Handling and transportation" spiked to □64.77 Cr, signaling a transition toward an asset-light, outsourced execution model.
- **Net Worth** remains under severe pressure with Reserves falling to -□70.00 Cr, leaving the company with negative equity attributable to owners (-□4.77 Cr); the consolidated Total Equity is only positive due to □134.00 Cr in Non-controlling interest.
- The **ROCE** of -1.00% highlights the failure of the current asset base to generate returns above the cost of capital, exacerbated by the fact that □32.27 Cr of the reported Cash Equivalents is earmarked for creditors and unavailable for reinvestment.
- **Other Assets** are dominated by CWIP which surged 411% to □52.14 Cr, indicating heavy investment in long-gestation projects like the Chennai ICD while the company is in a state of negative FCF.
- **Other Expenses** are driven by Handling and Transportation (□64.77 Cr) and Incentives to Business Associates (□17.04 Cr), reflecting the high cost of the outsourced logistics model which leaves very thin margins before fixed costs.

- The dominant financial theme of the year is **"Promoter-Funded Survival,"** where the company is cannibalizing its equity and relying on high-cost related-party debt to fund a high-stakes capital expenditure program while core operations remain loss-making and stagnant.

3.3 Contingent liabilities & commitments

- **Indirect Tax Matters:** ₹115.01 Cr (New disclosure in FY25; represents 52% of annual revenue).
- **Bank Guarantees:** ₹75.70 Cr.
- **Litigation:** RBL Bank has challenged the NCLT resolution plan disbursement, creating a binary risk regarding debt haircuts of ~₹300 Cr.
- **Disputed Claims:** ₹5.65 Cr in margin money recovered by IndusInd Bank is being disputed by the Resolution Professional as a violation of the IBC Code.

3.9 Earnings quality & forensic checks

#	Check	Impact	Status	Notes detail
1	PAT vs CFO trend	Profit ↑ — non-cash depreciation of ₹38 Cr and provision reversals mask ₹26 Cr net loss.	—	CFO is positive despite losses due to high non-cash depreciation and working capital adjustments.
2	Receivables & channel-stuffing signal	Revenue ↑↓ — aggressive booking risk; net receivables rose 63.7% while sales remained flat at 0.3%.	—	Note 7.1: Net receivables spiked despite stagnant revenue, signaling potential collection issues or aggressive revenue recognition.
3	Revenue timing (unbilled / contract assets)	Revenue ↑ — unbilled revenue of ₹18.05 Cr suggests early recognition before formal invoicing milestones.	—	Note 1.7 & 15: Revenue recognized at "point in time" but significant unbilled portion indicates a lag in billing.
4	Revenue from related parties %	Neutral — revenue concentration not disclosed, but high operational dependence on promoter-led logistics execution.	—	Note 17: Shift to "Handling and transportation" (₹64.77 Cr) suggests outsourcing to group-affiliated logistics partners.
5	Inventory vs revenue growth	Neutral — inventory is negligible; logistics model relies on service execution rather than stock.	—	Note 6: Inventory is effectively zero after a ₹1.87 Cr impairment of old stores and spares.
6	Inventory valuation method change	Neutral — no change in policy; inventory remains immaterial to the consolidated balance sheet.	—	Note 1.11: Valuation at lower of cost or net realizable value remains consistent.
7	Exceptional items in operating profit	Profit ↑ — one-time ₹22 Cr exceptional gain masks a deeper ₹47 Cr core loss.	—	Note 22: Includes a ₹9.67 Cr reversal of fuel tax provisions, providing a non-recurring boost to PAT.
8	Depreciation rate vs useful life policy	Profit ↑ — depreciation expense dropped 21% despite a ₹45 Cr increase in fixed assets.	—	Note 18: Lower depreciation on higher asset base suggests potential revision of useful lives or asset impairments.
9	Provision reversals boosting PAT	Profit ↑ — reversal of tax provisions and ECL adjustments artificially reduce the reported net loss.	—	Note 22: Reversal of fuel tax provision (₹9.67 Cr) used to offset operational underperformance.
10	Tax rate consistency	Profit ↓ — negative tax rate (-15%) reflects inability to recognize tax benefits on losses.	—	P&L shows tax credit/adjustment while Cash Flow shows actual tax outflow of ₹7 Cr.
11	CWIP age and stalling projects	Profit ↓ — CWIP surged 411% to ₹52 Cr, increasing interest capitalization and future depreciation.	—	Note 11.1(i): Primarily relates to Chennai ICD development; funded by high-cost promoter debt.
12	Deferred tax asset recognition adequacy	Profit ↓ — non-recognition of ₹136.5 Cr in tax losses signals lack of future profitability.	—	Note 1.18: Management does not find it "probable" that future taxable profits will be available.
13	RPT quantum and trend	Profit ↓ — promoter loans surged 289% at 12.5% interest, creating significant value leakage.	—	Note 11.1(j): Interest to related parties (₹10.14 Cr) is costlier than restructured bank debt (8%).
14	Dividend paid vs FCF adequacy	Neutral — no dividends paid; negative FCF of -₹35 Cr precludes any shareholder distributions.	—	Cash flow from operations (₹20 Cr) is insufficient to cover ₹84 Cr capex.
15	Auditor Confirmation Risk	Neutral — Debt figures derived from RP claims rather than direct lender verification.	—	Emphasis of Matter: High reconciliation risk for debt figures.
16			—	

#	Check	Impact	Status	Notes detail
	Subsidiary Reporting Quality	Neutral — Reliance on unaudited financial results for Joint Venture (Sical Sattva Rail Terminal).		Other Matter: Potential distortion of consolidated equity pick-up.
17	Negative Equity Attributable to Owners	Neutral — Equity attributable to owners is negative ₹4.77 Cr.	—	Note 1.2: Severe capital erosion; business is technically insolvent without minority interest buffer.

4. Management & governance

A. Auditor Report & Key Audit Matters * **Audit opinion type:** Unqualified. * **KAM - Implementation of Resolution Plan:** The auditor flagged that determining carrying amounts for derecognition of liabilities and impairment of assets required "significant judgment and estimates." This signals that the balance sheet "reset" is highly sensitive to management interpretation of the NCLT order. * **Emphasis of Matter:** The auditor explicitly stated: **"Confirmation of balances is not available from most of the financial creditors."** This is a critical forensic red flag; debt figures are derived from Resolution Professional (RP) claims rather than direct lender verification, posing a high reconciliation risk. * **Other Matter:** The auditor relied on unaudited financial results for the Joint Venture (Sical Sattva Rail Terminal) which were not prepared as per Ind AS, potentially distorting the consolidated equity pick-up. * **Auditor Fees:** Total consolidated fees: 0.31 Cr. 19.35% of the fee is for "tax audit."

B. Related Party Transactions

Party	Relationship	Nature	Amount (Cr)	Concern
Pristine Malwa Logistics Park	Holding Company	Loans Taken (Balance)	184.30 Cr	High-cost debt (12.5%) vs 8% bank debt.
Pristine Malwa Logistics Park	Holding Company	Interest Expense	10.14 Cr	Cash leakage via interest to promoter.
Pristine Malwa Logistics Park	Holding Company	Equipment Lease	Not Disclosed	Material RPT approved post-FY25.

- **RPT Risk Checks:** Related party debt now constitutes 34.6% of the total liability profile. Total RPT Debt + Interest (₹194.44 Cr) represents 87.65% of Revenue and 971.71% of CFO, indicating **Extreme Risk**.

C. Shareholding * **Promoter Holding:** 90.00%. * **Public Holding:** 10.00%. * **Pledged Shares:** 0.00%. * **MPS Compliance:** Non-compliant with the 25% Minimum Public Shareholding norm; 15% overhang remains.

D. Board Composition + KMP Compensation * **Total Directors:** 7; **Independent %:** 42.86% (Non-compliant with Reg 17 requiring 50% for an Independent Chairperson). * **Women Directors:** 1 (Ms. Neelaveni). * **KMP Compensation:** Seshadri Rajappan (WTD) received ₹0.54 Cr (5.88% YoY growth). The CFO (K. Rajavel) receives zero remuneration from the company, suggesting he is paid by the holding company, which reduces transparency.

F. Capital Allocation & Capex

Action	FY current (Cr)	FY prior (Cr)	% of CFO	Signal
Capex	84.16 Cr	16.00 Cr	420.59%	—
Asset Sales	29.00 Cr	12.00 Cr	144.93%	**Positive**
Interest Payments	43.25 Cr	39.18 Cr	216.14%	—
Net Debt Change	101.00 Cr	-77.00 Cr	504.75%	—
Lease Liabilities	76.21 Cr	64.23 Cr	380.86%	—

- **CFO Coverage of Capex:** 0.24. Only 24% of capex is funded from operations.
- **Nature of Capex: ₹52.14 Cr of CWIP** is primarily for the Chennai Rail Terminal, a high-stakes bet while the core is loss-making.
- **Deployment Efficiency:** Revenue grew 0.33% while Capex rose 426% YoY, indicating a "burn phase."
- **Key Takeaway:** Borrowing at 12.5% to fund a business with **-1.00% ROCE** is fundamentally value-destructive.

H. Risks * **Litigation (RBL Bank):** Binary risk that could reverse debt haircuts of ~₹300 Cr, leading to immediate insolvency. (High) * **Indirect Tax Claims:** ₹115.01 Cr in claims appeared in FY25; represents 52% of revenue. (High) * **Promoter Dependency:** ₹184.30 Cr in loans at 12.5% interest; interest burden exceeds operating profit. (High) * **Collection Risk:** Net Receivables grew 63.7% vs 0.33% revenue growth, signaling working capital stress. (Med) * **MPS Non-compliance:** Risk of delisting/fines; ₹9.61 Lakhs in penalties paid in FY25. (Med)

5. Scorecard & verdict

Part a: scorecard

Dimension	Rating (1–5)	Delta	Key evidence	One-line rationale
Business quality	2	→	Revenue flat at ₹222 Cr; Standalone mining down 39%.	Legacy business is withering while new segments lack critical scale.
Financial health	1	↓	D/E 14.86x; Current Ratio 0.36; FCF -₹35 Cr.	Severe liquidity stress and extreme capital erosion.
Earnings quality	2	↓	Receivables ↑ 63.7%; ₹22 Cr exceptional gains.	Profits are masked by non-recurring items and aggressive revenue signals.
Management & governance	2	↓	12.5% RPT loans; Non-compliant Board; MPS issues.	High promoter dependency and value leakage through expensive debt.
Capital allocation & earnings visibility	2	→	ROCE -1%; Capex 420% of CFO; CWIP ₹52 Cr.	Value-destructive capex funded by debt with uncertain near-term returns.

Business positives (for this company this year) * **SMART Segment Growth:** Revenue increased 15% to ₹120 Cr with a significant jump in PBT to ₹17.98 Cr. * **Asset Monetization:** Successfully generated ₹29.00 Cr from asset sales to support liquidity. * **Debt Discharge:** Discharged ₹331 Cr of legacy deferred debt as per the NCLT resolution plan. * **Strategic Pivot:** Entry into the pharmaceutical super-stockist model grew warehousing revenue by 21.6% to ₹62 Cr.

Business negatives / concerns (for this company this year) * **Extreme Leverage:** Debt-Equity ratio deteriorated to 14.86x from 5.67x YoY. * **Liquidity Crisis:** Current Ratio of 0.36 indicates current liabilities (₹269.94 Cr debt due) far exceed current assets. * **Working Capital Stress:** Net Trade Receivables spiked 63.7% to ₹72 Cr despite stagnant revenue growth of 0.33%. * **Value Leakage:** Borrowing ₹184.30 Cr from promoters at 12.5% interest while ROCE remains negative at -1.00%. * **Contingent Liability Spike:** Sudden

disclosure of ₹115.01 Cr in indirect tax matters, representing over 50% of revenue. * **Negative Equity:** Equity attributable to owners is negative ₹4.77 Cr, indicating technical insolvency of the parent.

Overall scorecard summary Sical Logistics is in a state of "Promoter-led Life Support," where financial restructuring has not yet translated into operational viability. The company's financial health is critical, characterized by extreme leverage (14.86x D/E) and a severe liquidity mismatch that makes it entirely dependent on high-cost promoter funding. Governance is clouded by significant related-party value leakage and non-compliance with board and shareholding norms. While the SMART rail terminal offers a glimmer of hope for FY26, the current trajectory is one of deteriorating capital efficiency and high forensic risk.

Part b: governance check matrix

#	Check	Status
1	Audit opinion clean?	—
2	Promoter pledge = 0?	—
3	KMP pay < 5% of PAT?	—
4	RPT quantum < 5% of revenue?	—
5	Board > 50% independent?	—

7	No statutory dues outstanding?	—
8	No fraud reported?	—
9	Audit trail enabled?	—
10	Frequent Auditor change	—

Total: 5/10 — Governance Rating: 2

Part c: investor verdict

Thesis: Sical is a distressed legacy player attempting a high-stakes turnaround through promoter-funded capex in rail-linked assets while core operations remain stagnant and loss-making. **Overall stance:** Avoid **Rationale:** The company is caught in a debt-trap cycle with negative equity and extreme dependency on 12.5% promoter loans that exceed its operating returns. **Re-evaluate when:** Net Debt/EBITDA falls below 4x and SMART terminal generates >₹50 Cr incremental annual EBITDA. **BULL CASE:** Successful commissioning of Chennai Terminal leads to a 2x jump in SMART EBITDA and a successful ₹250 Cr QIP at favorable valuations. **BEAR CASE:** RBL Bank litigation reverses debt haircuts or ₹115 Cr tax claim crystallizes, leading to immediate insolvency. **Key monitorable:** Current Ratio: 0.36 → Watch for improvement toward 1.0.

7. Year-over-year analysis

7.1 Changes

Metric / theme	Summary a status	Summary b status	Forensic takeaway
Revenue Growth	44% collapse (₹221 Cr)	Stagnant 0.3% growth (₹222 Cr)	The company has failed to transition from post-restructuring shrinkage to organic scaling despite management's optimistic narrative.
Capital Allocation	₹16 Cr Capex (200% of CFO)	₹84 Cr Capex (420% of CFO)	Management is aggressively accelerating a high-stakes infrastructure bet on the Chennai ICD while the core business remains cash-flow negative.
Working Capital	Net Receivables at ₹44 Cr	Net Receivables spike to ₹72 Cr	The 63.7% surge in receivables against flat revenue indicates either aggressive revenue recognition or a significant breakdown in collection efficiency.
Solvency & Leverage	Gearing at 71%	D/E at 14.86x (Negative Parent Equity)	Continuous losses have eroded the equity base to the point of technical insolvency, leaving the company entirely reliant on minority interest buffers.
Management Tone	Survivalist; focused on NCLT reset	Disconnected optimism; QIP on hold	The shift toward a "momentum" narrative is contradicted by the deferral of the ₹250 Cr QIP, signaling a lack of institutional appetite.
Margin Trajectory	8% OPM; ₹39 Cr Interest	10% OPM; ₹43 Cr Interest	Slight operational margin improvements are being completely neutralized by the rising cost of promoter-led debt.

7.2 Persistent patterns

- **Negative ROCE:** The company continues to deliver sub-zero returns (-3% to -1%), failing to generate any value above its cost of capital.
- **Promoter Debt Trap:** A consistent reliance on **12.5% interest-bearing loans from the Pristine Group** creates a permanent mechanism for value leakage from the distressed entity to the promoter.
- **Artificial Earnings:** Reported PAT remains consistently supported by **non-recurring exceptional items** (provision reversals and asset sales) that mask deep, persistent operational losses.
- **Litigation Overhang:** The **RBL Bank challenge to the NCLT resolution** remains a persistent binary risk that threatens to reverse the company's debt haircuts.
- **Cash Flow Deficiency:** In both periods, **Cash Flow from Operations (CFO) is insufficient to cover interest obligations**, necessitating a cycle of continuous borrowing to service existing debt.
- **Governance Non-compliance:** The company shows a recurring inability to meet **SEBI mandates for board independence and Minimum Public Shareholding (MPS)**, resulting in ongoing regulatory friction and fines.
- **Toxic Asset Base:** A massive portion of the balance sheet remains tied up in **fully-impaired legacy receivables (>₹213 Cr)**, reflecting a permanent loss of historical capital.
